

Introduction to Teaching and Learning (InTeL)

Join this flexible and online course module at Aarhus University and get a broad introduction to teaching and learning which help educators improve the quality of their teaching.

Dive into the key concepts and methods of teaching and learning, work with a relevant topic of your own choice, and discuss your teaching with peers and experts.

InTeL is a course module made entirely online where you as a participant read, write, discuss, watch videos and make quizzes at your own pace over the course of one week together with other teachers and colleagues in an online setting based on the LMS Brightspace. The field of interest in this course is all basic aspects of university teaching, including small-class teaching, online teaching, and clinical teaching, among other areas. Please, see the course description below for further details and registration link.

Course description

Objective

Introduction to Teaching and Learning (InTeL) is a module in university pedagogy for educators at all levels, all disciplines, and all forms of teaching.

The module provides a broad introduction to teaching and learning, including key concepts and methods, which help educators improve the quality of their teaching. Those key concepts and methods include alignment, active learning, learning outcomes, educational IT, examination, and evaluation. Additionally, the module delves into topics on lectures, classroom teaching, laboratory teaching, and clinical training with tips and tricks on how to improve your teaching.

Learning outcomes

Upon completion of the module, you will be able to:

- Identify elements in your teaching which can be further developed to enhance student learning.
- Apply a pedagogical principle or tool to the identified element.
- Argue briefly how the chosen principle or tool is expected to enhance student learning.

When the module is complete, you have developed a specific teaching plan that can be used in your teaching.

Content

The module is estimated to take approximately 7 hours and takes place in the course of one week. The teaching activities take place online in Brightspace.

The module will be held asynchronously, which means that there are no fixed meetings. It is possible to follow the module independently of place and time zone if the participant makes sure to follow the flow of the module and meet the deadlines.

The content of the module is a mix of text, video, and activities. During the week, participants must complete different tasks and work independently as well as relate to the contributions of other participants.

The module is primarily based on active participation and peer feedback, which is why it is essential that the participant is involved from the beginning of the week and can contribute evenly throughout the week. As a participant, you have the opportunity to work on the assignments, when it suits you the best, but experience shows, that participants usually are most busy on Tuesday and Wednesday. The deadline for the final assignment must be met.

Upon successful completion of the module, a diploma is issued.

Information

- **Span:** about 7 hours during one week (flexible hours)
- **Course certificate:** upon satisfactory completion
- **Language:** The module will be held in English
- **Number of participants:** 10
- **Course leader:** Anders Hjortskov Larsen, e-mail: ahlarsen@au.dk

Dates and registration

The course module will take place 12 -19 August 2022.

Registration deadline is 4 August 2022.

There is a limited number of seats that are distributed on a first-come, first-served basis.

Before registration for the module it is necessary to create an AUID and fill this in in the registration form.

The AUID is needed in order to give you access to the course site in Brightspace.

Please follow [this guide](#) and choose the option "Create AUID without NemID / MitID"

[Register here for participation in InTeL \(after creating an AUID\).](#)
