

# CUSU stance on Equality, Diversity and Inclusion in Circle U.

Inclusion is listening!

## Equality

promote equal  
opportunities for  
everyone

economic  
accessibility

look past binary  
structure

## Diversity

minimising structural  
biases & incorporate  
intersectionality into  
programmes

protecting religious  
diversity

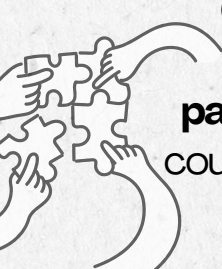

diversity amongst  
staff & students

## Inclusion

alternative teaching  
modes to include  
students with  
different necessities

accessible buildings  
and facilities

the university's  
definition of normality  
and deviation can  
unintentionally  
exclude students

Our universities have several bodies and committees dedicated to promoting equality, diversity, and inclusion, with active **student participation to address community needs**. These are important and could be a great asset to Circle U. and a potential centralised task force.

What we want:

- safe and respectful environment where everyone feels welcomed & is able to learn
- an alliance that recognizes both visible and invisible disabilities
- listening to underrepresented student groups because:

To include is not about telling but of understanding!
